/*Given an array of integers that is already sorted in ascending order, find two numbers such that they add up to a specific target number.

The function twoSum should return indices of the two numbers such that they add up to the target, where index1 must be less than index2. Please note that your returned answers (both index1 and index2) are not zero-based.

You may assume that each input would have exactly one solution and you may not use the same element twice.

Input: numbers={2, 7, 11, 15}, target=9 Output: index1=1, index2=2*/

-
- 思想：

- (1) 头尾指针思想：由于数组已经排序过了，值得注意的是输出时要+1才是符合要求的结果

- (2) return一个数组的写法：

```
return new int[]{a, b};
```
